

Heightsafe Solutions are proud to partner with Allens Training Pty Ltd to deliver Quality Training

Low Voltage Rescue Course

The Low Voltage Panel Rescue course is essential if you are conducting live work or working with live switchboards. The course covers the performance of rescue procedures from a live Low Voltage (LV) apparatus, not including overhead lines and underground cables in the workplace.

It specifies the mandatory requirements of rescue from a live LV panel and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

Low voltage rescue comprises responsive operations that involve the saving of life, or prevention of injury during an incident or dangerous situation.

PROVIDER OF TRAINING AND ASSESSMENT

This course is delivered by Heightsafe Solutions on behalf of Allens Training Pty Ltd - RTO 90909

Unit Being Delivered

The following unit(s) will be awarded to successful participants in this course. The certificate will be issued by Allens Training Pty Ltd - RTO 90909.

UETDRRF004 Perform a rescue from a live LV Panel
